

Star gaze at the Bruneau Dunes State Park Observatory

Friday & Saturday evenings March 23, 2018 through October 13, 2018

You're invited to star gaze at the Bruneau Dunes Observatory! See the night sky as you've never seen it before. View a planet, nebula, or a galaxy through the "Obsession" 25-inch Newtonian Reflector telescope. Observatory tours and solar viewing (through a specially adapted solar telescope) are available in the evening before the sun goes down. Program start-time listed is approximate and dependent on sunset. To maintain our night vision, we only use red lights at the observatory. Please bring bug spray, snacks and beverages.

The 30-40 minute orientation presentation, inside the Steele Reese Education Center, is followed by a survey of the heavens through the Observatory's collection of telescopes. There are viewing fees, and the payment types accepted at the Observatory are cash or check. If necessary, tickets may be purchased in advance, during business hours, at the Visitors' Center using a credit card. Children must be accompanied by an adult.

Solar Viewing and Tour Begins

March, April & May 2018	6:30 PM
June & July 2018	7:30 PM
August, September & October 2018	6:30 PM
