

Scavenger Hunt for Younger Children!

This scavenger Hunt is for younger children to get them observing nature while hiking in the park. While here you are encouraged to touch, smell, and listen to the wonders you encounter. Please **do not** collect live things, you can draw or take pictures instead.

1. Go and play on a sand dune. What does the sand feel like?

2. Look for a bug crawling on the ground. What color is it? If it is black, it is probably a beetle.

3. Smell a flower. Are there any bugs on the flower?

4. Touch a shrub with leaves. Are the leaves fuzzy or smooth?

5. Listen for a bird singing. Can you find it? Is the bird in a tree?

6. Find a track in the sand. Who made it? A lizard, a beetle, a rabbit or a mouse? Draw the track.
